Boating Speed Regulations

The area from the hydroelectric dam in Taylors Falls/St. Croix Falls, to the Arcola Sandbar at the mouth of the Apple River, is designated a slow speed zone. Motorboats may only create a minimal wake.

In slow-no wake zones, motorboats are restricted to the slowest possible speed necessary to maintain steerage, but in no case greater than five miles per hour.

There is also a slow-no wake rule pertaining to any area within 100 feet of all shoreline, including islands and within 100 feet of swimmers.

Updated Feb. 2006

Zebra Mussel Access Control Point

A closure for boat traffic traveling upstream exists at the High Bridge (mile 28.5) to prevent the spread of zebra mussels.

Low water conditions in summer may require wading in back channels.

Facilities	River Mile	Boat Launch	Toilets
